

TECHNICAL & PRODUCT BRIEF

DKMStack Website

Premium services website for UI/UX, web/app engineering, and QA delivery with conversion-focused contact flow.

Website: dkmstack.com

Next.js App Router

TypeScript

Tailwind CSS

Vercel-ready

01 What It Is

A modern, multi-page website that positions DKMStack as a reliable product and engineering partner. It combines strong visual identity, service clarity, and direct inquiry options to improve trust and lead conversion.

The implementation follows reusable React components, section-based layout architecture, and lightweight animation styling for polished UX without heavy runtime overhead.

02 Who It Is For

Founders & Business Owners

Need a partner for product UX, software delivery, and quality engineering.

Startup Teams

Want practical support for MVP builds, scale improvements, and reliable releases.

Enterprise Stakeholders

Evaluate process maturity, communication clarity, and long-term technical ownership.

Partnership Leads

Need quick discovery calls and direct contact with clear response expectations.

03 Routes & Pages

Route	Page	Key Features
/	Home	Hero positioning, service highlights, conversion-first section flow.
/about	About	Company narrative, capability story, mission and quality emphasis.
/services	Services	Offerings for UI/UX, web/app development, and QA/testing tracks.
/why-us	Why Us	Differentiators, trust signals, and delivery mindset.
/contact	Contact	Form-based inquiry plus direct email channel and fast follow-up path.
/hero	Hero Preview	Isolated hero presentation route for demos and iteration.

04 UI & UX Terminology

- Dark-surface brand palette with cyan/blue gradients.
- Card-based content hierarchy and readable typography scale.
- CTA clarity with clean spacing and semantic section order.
- Reusable component system for rapid updates.
- Mobile-first responsive behavior and accessible structure.

05 Tech Stack (A-Z Reference)

Key	Detail
A11Y	Semantic structure, readable content flow, keyboard-friendly controls where implemented.
Build	Next.js scripts: <code>npm run dev</code> , <code>npm run build</code> , <code>npm run start</code> .
CSS	Tailwind CSS utility-first styling with project-specific visual refinements.
Framework	Next.js App Router architecture.
Language	TypeScript for typed components and route logic.
Libraries	Framer Motion, lucide-react, Upstash Redis + Ratelimit.
Deployment	Vercel-ready with static/dynamic route support.

06 Repo Layout (Mental Model)

Path	Contents
app/	Route-level pages and API endpoints.
components/	Shared UI modules: hero, about, services, contact, footer, navbar.
public/brand/	Brand assets, logo variants, visual exports.
README.md	Environment setup, scripts, and deployment guidance.

07 Contact & Integrations

Primary contact: contact@dkmstack.com
Alias emails: info@dkmstack.com, support@dkmstack.com
Integrations: Next.js contact API route, optional distributed rate limit via Upstash Redis, and Vercel deployment workflow.

08 Elevator Line

DKMStack delivers modern digital product execution through sharp UI/UX, scalable engineering, and quality-first testing, wrapped in a clean conversion-oriented web presence.
